PROFESSIONAL SUMMARY

Bachelor of Pharmacy (B.Pharm) candidate at Jamia Hamdard with practical industrial training in High-Performance Liquid Chromatography (HPLC) and certified in Good Clinical Practice (NIDA CTN GCP, valid to June 2029). Experienced in chromatographic sample preparation, calibration curve generation, clinical compliance, and molecular modeling. Seeking an immediate pharmaceutical internship or junior analyst role in quality control, analytical development, or clinical trial operations.

EDUCATION

Jamia Hamdard <i>Bachelor of Pharmacy (B.Pharm) Academic Distinction Across Semesters</i>	New Delhi, Delhi, India <i>2023 to Present</i>
---	---

INDUSTRIAL AND CLINICAL TRAINING

HPLC Industrial Training and Quality Analysis Arbro Pharmaceuticals Pvt. Ltd. – Completed practical training at Arbro Analytical Division in collaboration with IPA-Delhi State Branch. – Prepared mobile phases, analytical reference standards, and dilutions; executed column equilibration and baseline stabilization under GLP standards. – Analyzed chromatographic separation parameters, retention times, and peak integration data using reverse-phase HPLC instrumentation.	March 2026
Good Clinical Practice (GCP) Certification NIDA Clinical Trials Network – Completed 6-hour ICH-GCP curriculum covering clinical trial design, ethical regulations, and investigator responsibilities. – Trained in Institutional Review Board (IRB) protocols, informed consent procedures, adverse event reporting, and trial documentation. – Studied source document verification (SDV), trial master file (TMF) organization, and data integrity standards for regulated trials.	June 2026 to June 2029
Molecular Docking and Virtual Screening Training Discovery Boulevard – Executed receptor-ligand docking protocols, grid parameter definitions, and binding energy calculations using AutoDock and AutoDock Vina. – Mapped intermolecular hydrogen bonds, bond lengths, and hydrophobic interactions using BIOVIA Discovery Studio and PyMOL.	June 2026

APPLIED PROJECTS

Structure-Based Drug Screening Pipeline The Insilico Lab Fellowship – Evaluated five sulfonamide drugs for physicochemical compliance using Lipinski Rule of Five and SwissADME bioavailability metrics. – Screened organ toxicity, blood-brain barrier permeability, and metabolic profiles with ADMET-AI; validated active site orientations against AlphaFold3 models.	July 2026
Bioactive Compound Profiling and Safety Indexing Zenodo Repository – Authored a review paper evaluating therapeutic constituents and safety margins of <i>Tinospora cordifolia</i> (DOI: 10.5281/zenodo.19390923). – Consolidated toxicological benchmarks and dosage data from primary pharmacology literature to establish compound safety margins.	October 2025

LEADERSHIP AND COORDINATION

Operations and Logistics Volunteer Snow Frost Hackathon, Spark Tech AI Hub – Managed attendee check-in operations, logistical schedules, and technical equipment allocation across active project tracks.	January 2026
Conference Support Volunteer SECON 2025, Jamia Hamdard – Supported conference logistics, speaker scheduling, and poster hall coordination for international academic delegates.	October 2025

TECHNICAL AND REGULATORY SKILLS

Analytical Instrumentation: Reverse-phase HPLC sample preparation and operation, UV-Vis Spectrophotometry, standard curve generation, serial dilutions, GLP/GMP awareness.

Clinical and Regulatory: Good Clinical Practice (ICH-GCP), clinical trial documentation, IRB protocols, Trial Master File (TMF), Adverse Event reporting, Standard Operating Procedure (SOP) compliance.

Software and Informatics: AutoDock, AutoDock Vina, PyMOL, BIOVIA Discovery Studio, ChemDraw, Microsoft Excel (data calculation, charting), PowerPoint, Python (introductory data processing).

Professional Competencies: Technical reporting, protocol adherence, laboratory safety compliance, analytical accuracy, English (fluent, professional).
